VEE GEE digital stem thermometers are ideal for temperature monitoring in essentially any setting—the laboratory (easily monitor reagents and liquids in test tubes, beakers, & flasks), food processing, refrigeration, and green houses, for example.

Model 83210 features a dual scale (-50° to 150°C / -58° to 302°F), fast 1-second update time, and a swiveling head that can be moved a full 180° for easy reading in any position. Both the ON/OFF switch and the Scale Selection switch are located on the face for simple access.

The 127mm (5") stem is stainless steel and has a 3.5mm (0.138") diameter. Provided with a protective case featuring a pocket clip. Also includes a 1.5V alkaline coin cell battery (Type LR44) and features automatic power-off after 10 minutes of idle use.
